« Trees hiding the forest? »

So many assets which used to hide for a long time the reality

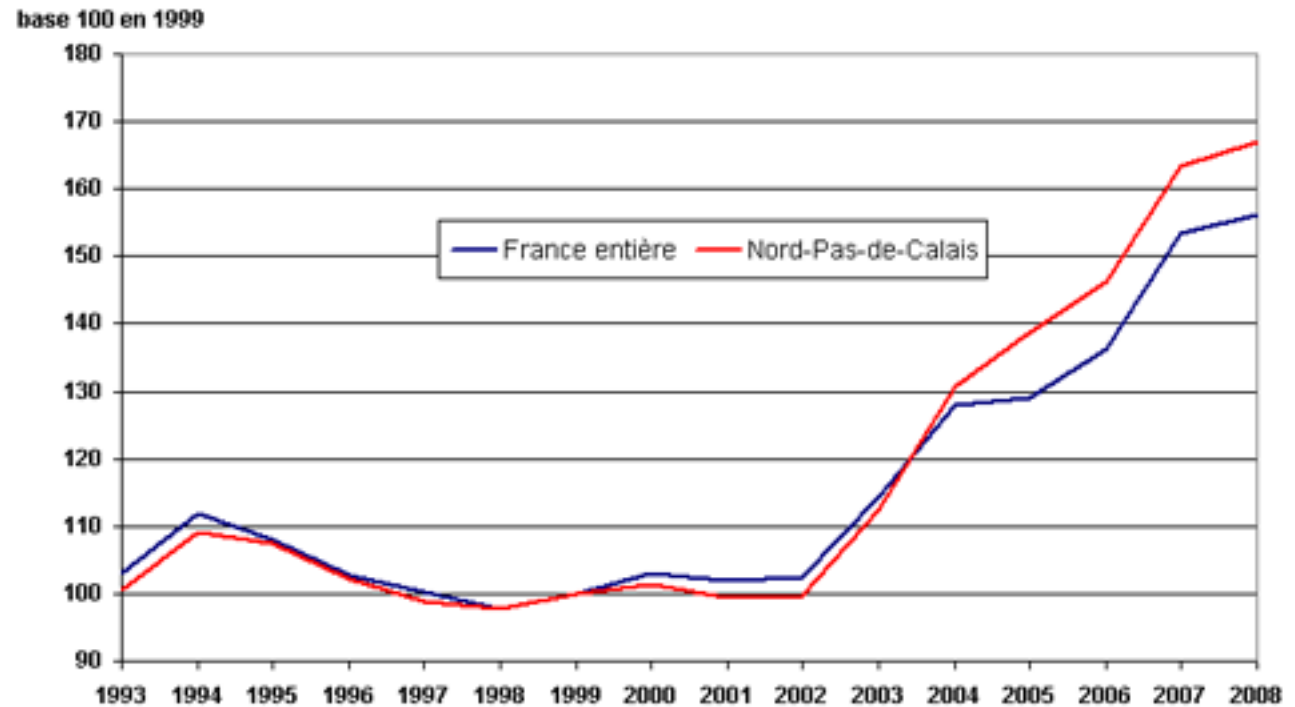

LILLE was during the last ten years the region with:

- The lowest rate in terms of SME creation of France*
- The lowest rate in terms of innovation (patent) of France*
- The lowest rate in terms of VC's investment in innovative economic sector and businesses*

From 1993

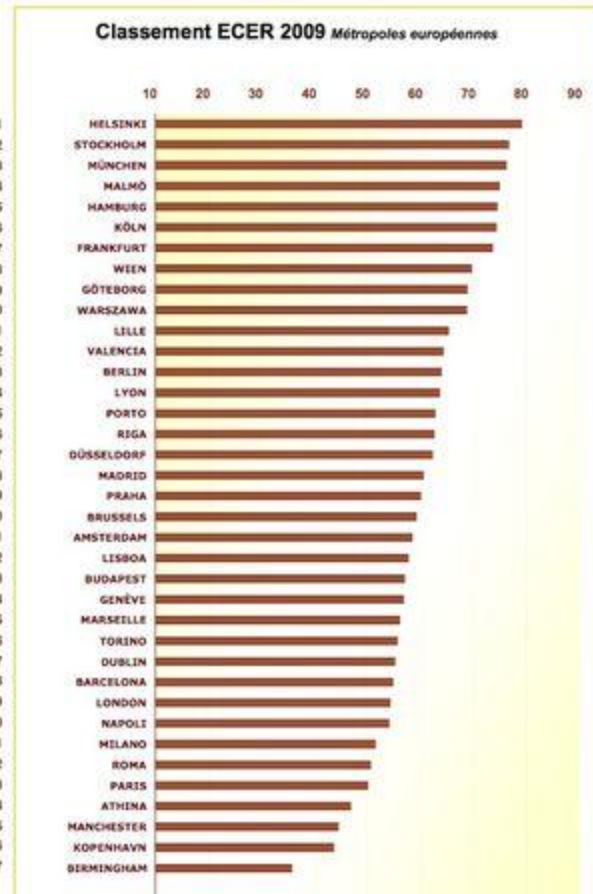

Évolution des créations d'entreprises entre 1993 et 2008

Source : Insee, Répertoire des entreprises et des établissements

2009

A 2009 study led by ECER (based on the study « European Cities Monitor » Cushman & Wakefield) towards 2400 european entrepreneurs, to evaluate european metropoles attractivity brought these results :

Lille is the first french city in terms of entrepreneurs attractivity and the eleventh in Europe.

Why such a growth?

Within the last 10 years, local authorities used to face:

The E-transformation needs

Entrepreneurs communities and networks needs

Training needs (invest in people)

Innovation needs (invest in future)

Strengthen public/private cooperation (Invest in economy)

by

- **Launching huge programs in different sectors (health, transport, IT, textile, e-business and VAD)**
- **Supporting cluster policies (crossed fertilization)**
- **Providing massive support to incubation policies**

And each program had is :

- **own infrastructure**
- **A dedicated development agency fostering incubation, entrepreneurship support (ante and post creation, growth financement, innovation), setting-up, job creation, innovation policies, international development support.**

Our focus : the IT sector

IT sector in Lille-Northern France?

- 4000 IT companies for 30000 employees (In progress +3,5%)
- In 2007, 450 IT companies have been launched.
- S1 2008, 280 IT companies has been launched

A concept : ICE³...

- **Innovation** : *to precede rather than to follow, EuraTechnologies aims to become a technological factory based on companies/universities and labs collaboration (technology standard providers)*
- **Convergence**: *put together (in the same area) actors (labs, companies, users and universities, VC's from private and public sectors)/ projects/ innovation in the IT field and create the ecosystem.*
- **Emergence** : *by providing incubation support policies*
- **Entrepreneurship** : *by facilitating entrepreneurship spirit (by giving opportunities to project holders example : our early stage incubator is free, and we provide telephone and internet connexion, one stop shopping)*
- **Excellence** : *by delivering high standard quality support and services answering to companies requests (from facilities to mentoring and coaching*)*

* Based on performance and growth indicators : qualified employment and skills, turnover growth (in and outside boundaries), r&d rate in the activity, ...

... named Euratechnologies

And it works!

- *Launched in March 2009, this 25000 sqm open business concept is already hosting 100 companies (start ups; SMEs; large accounts) 1700 employees*
- *Ecosystem creation “research centers, universities, SMEs and large accounts, training centers and innovative “spin offs” like “the european contactless center”*
- *Local authorities invest now in project (refundable advances rather than subsidies) and no more in organizations.*

« Driving a former textile mill to an IT international hub, it's all about transformation ...

.... and entrepreneurs support »
